Hepatitis Viruses Real-Time PCR Kits

Hepatitis is the inflammation of the liver tissue. Acute hepatitis may resolve on its own, progress to chronic hepatitis, or (rarely) result in acute liver failure. Chronic hepatitis may progress to liver scarring (cirrhosis), liver failure, and liver cancer. The most frequent cause of liver cirrhosis, liver cancer, and fatalities from viral hepatitis is a combination of types B and C, which cause chronic disease in hundreds of millions of people. An estimated 354 million people worldwide live with hepatitis B or C.

Herpesviruses Real-Time PCR Kits

Herpesviridae is a large family of viruses that cause infections and certain diseases in humans and animals. Members of this family are also known as herpes viruses. Nine herpes virus types are known to infect humans: Herpes simplex viruses 1 and 2 (HSV-1 and HSV-2, also known as HHV-1 and HHV-2), varicella-zoster virus (VZV, also called HHV-3), Epstein-Barr virus (EBV or HHV-4), human cytomegalovirus (HCMV or HHV-5), human herpes virus 6A and 6B (HHV-6A and HHV-6B), human herpes virus 7 (HHV-7), and HHV-8.

Respiratory Pathogens Real-Time PCR Kits

Respiratory tract infections are typically divided into upper and lower respiratory tract infections which occur mainly in the nose, and throat affecting the upper respiratory system, windpipe, airways, and lungs affecting the lower respiratory system. From the clinical point of view; symptoms such as nasal obstruction, nasal discharge, sore throat, cough, and irritation occur as upper respiratory tract infections, and symptoms such as bronchitis and pneumonia occur as lower respiratory tract infections.

Sexually Transmitted Diseases Pathogens Real-Time PCR Kits

Sexually transmitted diseases (STDs) can lead to infertility, ectopic pregnancy, miscarriage, and cancer. Globally, over 1 billion people have contracted STDs caused by bacteria, parasites, fungi, or viruses.

Meningitis & CNS Pathogens

Real-Time PCR Kits

Meningitis is an inflammation that affects the membranes (meninges) covering the spinal cord and the brain. Viral meningitis often poses a low risk of death, while bacterial meningitis may result in relatively more severe conditions and can result in almost half a million casualties annually, as it can spread easily among people by contact. In addition, neonatal meningitis, though less prevalent, causes high mortality and morbidity among newborns.

Tropical Pathogens Real-Time PCR Kits

Tropical diseases are affecting a large number of people in regions such as Sub-Saharan Africa, Southeast Asia, Eastern Mediterranean, Western Pacific, and America.

The infections that cause death such as West Nile virus transmitted by mosquitoes and Crimean Congo hemorrhagic fever transmitted by ticks, which is brought to the agenda with the deaths it causes at various times every year are among tropical pathogens.

Gastroenteritis Pathogens Real-Time PCR Kits

Gastrointestinal tract infections (gastroenteritis) include bacterial, viral, and protozoan pathogens that cause inflammation of the mucous membranes of the gastrointestinal tract. They rank as the second highest rates of mortality and morbidity following pneumonia, especially in children under 5 years of age in developing countries. Apart from the serious consequences of gastroenteritis infections, the disease is a burden on the health services in developed countries. Therefore, rapid and accurate diagnosis is very important worldwide.

UNIO 448 System

UNIO 448 is a high-throughput, sample-to-result solution that streamlines the entire molecular diagnostics workflow—from sample to result—within a compact, user-friendly system.

Method	Sample to result; fully automated reagent preparation, NA extraction & PCR amplification
Capacity	Up to 448 tests in 8 hours
Sample Volume	200-500 µL
Elution Volume	60-150 µL
Heating Block	✓
UV Light	✓
Size and Weight	D: 908.5 × W: 2417 × H: 1586 mm – 835 kg

UNIO 96 Extraction & PCR Setup System

UNIO 96 Extraction & PCR Setup System is designed and developed for automated extraction of DNA/RNA from different sources including body fluids originating from serum, blood, plasma, nasopharyngeal swabs, oropharyngeal swabs.

Method	Fully automated extraction with silica-coated magnetic beads / rapid extraction method without magnetic beads
Capacity	1-96 samples
Sample Volume	200/400 µL
Elution Volume	80/150/200/400 µL
Efficiency	Up to 10 µg/200 µL
Heating Block	✓
UV Light	✓
Barcode Reader	✓
Size and Weight	D: 795 x W: 1124 x H: 903 mm - 150 kg
Run Time	60-140 min depending on the extraction kit/protocol

UNIO A24S Extraction & PCR Setup System

UNIO A24S is a fully automated laboratory instrument for nucleic acid extraction and PCR setup. The instrument enables fast, pure, efficient, and contamination-free nucleic acid extraction from a wide range of biological samples using silica-coated magnetic bead technology.

Method	Fully automated extraction with silica-coated magnetic beads / PCR setup with up to 4 different thermal protocols
Capacity	1-24 sample
Sample Volume	100/200/400/600 µL
Elution Volume	60/100/150/200 µL
Heating Block	✓
Cooling Block	✓
UV Light	✓
Barcode Reader	✓
Size and Weight	D: 660 x W: 920 x H: 920 mm - 180 kg
Run Time	60-180 min depending on the extraction kit/protocol and PCR kit

UNIO B48 Extraction System

UNIO B48 Extraction System has everything B24 has, and more. The device is designed for the automatic extraction of DNA and RNA from biological samples (such as blood, serum, plasma, etc.) using magnetic particles. UNIO B48 consists of two separate blocks, each with an independent 24-sample capacity, and can easily process samples ranging from 1 to 48 after a short preparation time.

Method	Fully automated extraction with silica-coated magnetic beads
Capacity	1-48 samples
Sample Volume	100/200/400/600 µL
Elution Volume	60/100/150/200 µL
Heating Block	✓
UV Light	✓
Size and Weight	D: 660 x W: 920 x H: 920 mm - 180 kg
Run Time	45-110 min depending on the extraction kit/protocol

UNIO B24 Extraction System

UNIO B24 Extraction System is a laboratory instrument for the automated extraction of nucleic acids (DNA/RNA) from various biological samples (whole blood, serum, plasma, swab, tissue, etc.) and food samples (including meat, milk, seed, feed, gelatin) using paramagnetic particles. UNIO B24 Extraction System enables fast, pure, efficient, and contamination-free nucleic acid extraction using embedded protocols ready-to-use cartridge system pre-filled by automation.

Method	Fully automated extraction with silica-coated magnetic beads
Capacity	1-24 samples
Sample Volume	100/200/400/600 µL
Elution Volume	60/100/150/200 µL
Efficiency	Up to 10 µg/200 µL
Heating Block	✓
UV Light	✓
Size and Weight	D: 580 x W: 660 x H: 920 mm - 110 kg
Run Time	18-95 min depending on the extraction kit/protocol

UNIO M32 Extraction System

UNIO M32 Extraction System is an automated laboratory instrument for nucleic acid extraction (DNA and RNA) from biological and food samples based on silica-coated magnetic beads for use in downstream PCR applications, for diagnostic purposes. UNIO M32 consists of an LCD touchscreen for ease of use. This instrument can process 1 to 32 samples after a short preparation time.

Method	Automated extraction with silica-coated magnetic beads
Capacity	1-32 samples
Sample Volume	100/200 µL
Elution Volume	100 µL
Heating Block	✓
UV Light	✓
Size and Weight	D: 310 x W: 385 x H: 369 mm – 18 kg
Run Time	12-50 min depending on the extraction kit/protocol

UNIO M8 & M16 Extraction Systems

UNIO M8 & UNIO M16 Extraction System is an automated laboratory instrument for nucleic acid extraction (DNA and RNA) from biological and food samples based on silica-coated magnetic beads for use in downstream PCR applications, for diagnostic and veterinary purposes. They consist of an LCD touchscreen for ease of use.

Magrev 24 Manual Magnetic Bead Nucleic Acid Extraction Stand

Magrev
24

IVDR

IVD CE

Magrev 24 Manual Magnetic Bead Nucleic Acid Extraction Stand for 24 Samples and Magrev Mini Base Extraction Stand are extremely advantageous and cost-effective platforms. Magrev is a very attractive system for both research and also diagnostics purposes.

Genomic DNA extraction for 24 samples requires only 20 minutes of hands-on time, without the need for changing tube positions, also with no need for centrifugation. It's not a prerequisite, but using a 6-channel adjustable spacer pipette makes the system even more practical and therefore is highly recommended.

Magrev Mini Extraction Stand Base Unit provides the advantages of Magrev 24 Manual Extraction Stand with a twist! If you are handling smaller number of samples, Magrev Mini base unit gives you the liberty to increase the slots you can work as many as you wish, depending on your samples.

Magrev Mini, designed, patented and produced by Anatolia Geneworks, is a unique approach to manual nucleic acid extraction by using magnetic beads.

Anatolia Geneworks is a biotechnology company that carries out its activities in accordance with the ISO 9001:2015, ISO 13485:2016 standards, 98/79/EC directive, EU 2017/746 IVDR, and 2006/42/EC regulations ensuring that its products can be used safely in Türkiye and abroad. Anatolia became the first company in Türkiye to get IVDR certification for high-risk molecular diagnostic products.

Anatolia's main expertise is designing, developing, and manufacturing nucleic acid extraction kits, rapid diagnostic kits, recombinant enzymes, Real-Time PCR, and automated nucleic acid extraction devices, and PCR Setup robots. With the integration of Real-Time PCR instruments manufactured under Anatolia Geneworks is one of the very few companies in the world with the ability to create turnkey solutions for Real-Time PCR applications.

Anatolia Tanı A.Ş. has an impressive R&D Center with highly advanced infrastructure and a high-quality multidisciplinary R&D team. As of 21st October 2021, Anatolia became a publicly listed company on the Istanbul Stock Exchange (BIST). Anatolia has subsidiaries abroad in Germany, the Netherlands, Italy, Poland, Bulgaria, and Pakistan.
